

Verjú

Verjú is the first green laser to receive FDA market clearance for non-invasive fat loss. The Verjú has proven to do in weeks what others can only claim after months, and it is reportedly the only green body contouring device to be proven through a Level 1, multi-site, placebo controlled, double-blind study. The Verjú utilizes Erchon's patented line generated low level lasers to target pockets of uneven fat in the thighs, buttocks and lower abdomen. Verjú is a pain free procedure and void of any harmful side effects.

ThermiRF

ThermiRF® is a platform technology that uses temperature as a clinical endpoint for various minimally and non-invasive aesthetic applications (ThermiTight®, ThermiRase®, ThermiDry®, ThermiSmooth® Face and ThermiVa®). When combined with external infrared imaging, ThermiRF treatments have been shown to be safe.

Tensage Stem Cell Cream & Eye Cream

Skincare's only stem cell activator, Tensage Stem Cell Cream and Eye Cream, feature CellPro Technology, a unique ingredient containing signaling proteins extracted from the eggs of the *Cryptomphalus aspersa* snail, in an exclusive, patented process. Clinically proven to assist the natural activity of stem cells, Tensage Stem Cell utilizes this new metabolic pathway to replenish skin cells, reinforce skin's integrity and restore radiance, firmness, smoothness and a more youthful appearance.

Biopelle, Inc.: 866-424-6735 or visit www.biopelle.com

Halo

Halo is the world's first Hybrid Fractional Laser that delivers a non-ablative and ablative wavelength to the same microscopic treatment zone. Combining these two wavelengths creates a strong synergistic effect, resulting in ablative results with non-ablative downtime. The non-ablative wavelength of 1470 nm is tunable from 200 to 700 microns, the optimal depth for treating the epidermis and papillary dermis. The 2940 nm Er:YAG laser provides pure ablation with no bulk heating, tunable from 20 to 100 microns.

Sciton: 888-646-6999 or visit www.sciton.com

ZWave

The Zimmer ZWave constitutes the latest development in the treatment of cellulite. The ZWave utilizes an electromagnetic generator to create a ballistic force that is transferred to the applicator. Utilizing soft pulse technology to enhance patient comfort, it delivers pulsed radial wave therapy to the treatment area. The ZWave is designed to temporarily reduce the appearance of cellulite. Average or typical patient treatment time is 15-30 minutes.

Advice Media

Advice Media is a leader in online digital marketing for medical practices. We offer beautiful websites and proven marketing through SEO, social media, review management and paid search so that we are the last company you will need.

Advice Media: 800-260-9497 or visit www.AdviceMedia.com

miraDry

The miraDry system is the first FDA cleared, non-invasive procedure for permanent reduction of underarm sweat. miraDry is also FDA cleared for permanent reduction of underarm hair of all colors. The miraDry system uses miraWave® Technology – precisely delivered microwave energy – combined with hydroceramic cooling to destroy sweat and odor glands, as well as hair follicles, while protecting the epidermis, upper dermis and sensitive underlying structures. Most patients see results in as little as one fast, safe treatment. miraDry provides one of the highest patient satisfaction ratings of all non-surgical aesthetic procedures.

EDGE

The EDGE fractional laser offers a superior solution for rejuvenating and resurfacing skin and tissue. EDGE can be used to treat fine lines and wrinkles, acne and surgical scars, skin pigmentation and discoloration, sun damage, uneven skin texture and atrophy. EDGE offers a selection of fractional spot sizes for optimal energy delivery, along with convenient controls on the handpiece for adjusting pattern shape and size.

Collagen P.I.N.

Collagen P.I.N. is a new innovation in advanced collagen induction therapy that introduces a controlled wound into the skin triggering the release of natural growth factors, new collagen and elastin. Automated microneedling causes less damage to the epidermis than dermal rolling, laser or other ablative treatments. Utilizing Collagen P.I.N. with our Induction Therapies clean, clinical products (specifically designed for use post microneedling) minimizes complications and provides quicker healing and longer lasting results. More needles. More power. More depth. More collagen.

Collagen P.I.N.: 877-746-4407 or visit www.collagenpin.com / www.inductiontherapies.com

M22 ResurFX

The ResurFX module of M22 is a true, one-pass, fractional non-ablative treatment technology. Unlike other fractional technologies, ResurFX needs only one pass to be effective, saving you time and protecting the patient's skin. ResurFX uses a 1565 nm fiber laser and a very advanced scanner, which enables you to choose from more than 600 combinations of shape, size and density for optimal treatment results. Even better, your practice wins as there are no consumables or recurring procedure fees.

Prima Pico

Prima Pico™ is a powerful picosecond device offering multiple emission modes. QuattroPulse™ technology allows the device to be operated in four separate emission modes: Picosecond, Q-switched, OptiPulse™ and Photo-Thermal pulse durations, giving you even more treatment options, efficacy and flexibility. An optional six-filter IPL can be added to the Prima Pico, further expanding available indications and profitability.

Quanta Aesthetic Lasers: 866-353-5115 or visit www.quantausa.com

Infiniti

Infiniti delivers wrinkle reduction through High Intensity Focused RF which provides three-dimensional energy to volumize tissue. Highly focused RF energy, delivered via insulated gold-coated microneedles, creates precise and controllable fractionated coagulation zones within a specific layer of the dermis. Adjustable depth control allows for customized and reproducible treatments of delicate areas. Infiniti effectively lowers the risk of PIH in dark skin types and can be safely used on patients with melasma and other types of pigmented lesions. Patented ComfortFlow™ technology maximizes comfort and patient satisfaction.

BTL Vanquish ME

Further improving on its patented non-invasive Vanquish technology to reduce stubborn fat around the midsection, BTL Aesthetics introduces its newly engineered BTL Vanquish ME (Maximum Energy). This latest iteration takes body contouring to the next level with increased tuning performance, more concentrated thermal energy and less scatter to non-fatty tissue than previously possible. The result is a more homogeneous heating leading to higher overall temperature elevation. A large spot size is designed to treat the whole abdomen from flank to flank during one session.

BTL Industries: 866-285-1656 or visit www.btl.aesthetics.com

LASEmaR 1500

LASEmaR 1500 by Eufoton Medical Lasers, a leading European laser manufacturer, is a portable, solid-state diode multidisciplinary laser platform that can be used for skin rejuvenation, fractional resurfacing, tightening and lifting, laser-assisted liposuction and vascular surgery. Additional treatments are available using different size optical fibers for other treatments in surgery, facial contouring (endolift and laser-assisted liposuction), granulomas, hyperhidrosis and endovascular ablation. This complete system comes with a heavy duty transport case.

The Essential Recovery Kit

Comprised of Priming Oil, Enriched Firming Mask and Medical Barrier Cream, the Essential Recovery Kit is a convenient take-home regimen to care for the skin following moderate to deeper skin rejuvenation procedures. The products quickly help restore skin barrier function while providing a surge of hydration, soothing and calming highly sensitized skin. The Kit helps minimize downtime following a procedure, and patients will experience a reduced risk of erythema and post-inflammatory hyperpigmentation.

Episciences, Inc.: 866-EPIONCE (374-6623) or visit www.epionce.com

Dynamis Pro

This all-in-one, anti-aging laser platform allows fast, precise and efficient procedures with reduced recovery times. With fully customizable settings, the system achieves true third-generation Er:YAG resurfacing. The Nd:YAG wavelength is a gold standard in wrinkle reduction, acne, pigmented and vascular treatments. Nd:YAG and Er:YAG scanner compatibility further enhances treatment speed, safety and efficacy, especially for large treatment areas. The SP Dynamis combines popular aesthetic applications with additional minimally invasive surgical procedures (laser lipolysis, etc.).

Fotona: 949-276-6650 or visit www.fotona.com

PicoWay

The PicoWay picosecond workstation at 532 nm and 1064 nm adds a third wavelength (785 nm; 510k pending) for comprehensive removal of multicolor tattoos on the widest variety of skin types. With the shortest pulse duration (200 ps – 450 ps), the PicoWay can disrupt the smallest pigment, thus clearing tattoos faster. The addition of a fractional dual wavelength handpiece adds anti-aging treatment options with almost zero downtime.

LightPod Neo

Aerolase 650 ms laser technology offers a new approach for highly effective, long lasting results for treating active acne including problematic conditions such as nodulocystic acne and acne conglobata. This new treatment option offers an efficacious solution for patients who have not been able to use or have not responded to traditional therapies. Aerolase laser technology allows immediate results, is uniquely gentle and sanitary, and offers maximum versatility for both adolescent acne and adult acne.

Aerolase: 914-345-8300 or visit www.aerolase.com

DualMax

DualMax IPL is one of the most convenient and complete IPL systems on the market. This device is powerful, high performing, safe and very simple to use with a 10 Hz Fast Delivery Pulse (FDP), allowing the user to achieve faster and more effective hair removal treatments. It is also equipped with an auto chilled sapphire crystal, making treatment virtually painless. In addition to hair removal, DualMax can be used for acne, skin rejuvenation, pigmentation and vascular lesions. It comes with two spot sizes for your convenience.

SupraMedical, LLC: 954-315-4668 or visit www.supramedical.net

NANOPORE stylus 1

NANOPORE stylus 1 is the next generation in micro exfoliation technology, promoting skin health through a non-invasive proprietary dermatological device that offers a comprehensive solution for skin rejuvenation, allowing specialists to customize skincare to fit the needs of every patient. First, it removes superficial skin through superior exfoliation, removing dead cells; then, it micro exfoliates the stratum corneum, increasing the absorption of active cosmetic ingredients. Visibly aids in reducing the appearance of fine lines, photo-aging and pores. Also helps improve clarity, firmness and skin tone.

Sesderma USA: 800-796-0996 or visit www.sesdermausa.com or www.medidermausa.com

Tensage

Tensage features SCA Biorepair Technology, a special secretion from the Cryptomphalus aspersa snail, which contains growth factors combined with glycoproteins and antioxidants. Tensage is clinically proven to help reduce lines and wrinkles, increase elasticity and enhance texture, tone and luminosity. Tensage has a complete line of products to help rejuvenate skin and reverse the visible signs of photodamage. Tensage 40 ampoules are used extensively to dramatically reduce downtime from procedures like microneedling, lasers and peels.

Biopelle, Inc.: 866-424-6735 or visit www.Biopelle.com

PiQo4

The PiQo4 is a new picosecond / nanosecond pulsed laser for tattoo removal. The '4' in PiQo4 signifies the four different wavelengths (1064 nm, 532 nm, 585 nm, 650 nm) and four pulse width options from 600 ps to 8 ns. The PiQo4 is reportedly the highest pulse energy picosecond / nanosecond laser on the market, and has shown effective on nine of the ten most popular tattoo ink colors. Designed and manufactured in Bethel, Conn., by Focus Medical, the PiQo4 is exclusively available from Zarin Medical in North America.

Focus Medical: 203-730-8885 or visit www.focusmedical.com

Phoenix CO₂

The Phoenix CO₂ is priced under \$30,000 and can be used to remove uneven pigmentation and reduce fine lines and coarse wrinkles. Depending on which handpiece is attached, the Phoenix-15 can cut, coagulate and vaporize soft tissue. The Phoenix CO₂ features the largest scan pattern in the industry and can resurface both hands in under two minutes.

Rohrer Aesthetics: 205-940-2200 or visit www.rohreraesthetics.com

EndyMed PRO

The EndyMed PRO uses unique 3DEEP RF technology to provide deep (11 mm) non-ablative RF aesthetic treatments. The EndyMed PRO is available with a range of handpieces that are customized to different treatment areas. It has an easy-to-use touch screen interface and is equipped with a range of safety features for painless treatments with no downtime. Integrated real-time impedance measurements deliver direct and exact energy customized to each patient's skin impedance.
