ProGen PRP

Many Platelet-Rich Plasma (PRP) systems are available on the market today, but not all are created equal. The Bellus Medical ProGen™ PRP system is recognized as the most flexible, validated kit in the marketplace that can deliver 2 x and 5.1 x PRP and validated 5 x concentration of growth factors. Its flexibility, combined with single spin options, a reduction in procedure time and consistently repeatable results, offers the best value in the PRP market. This adaptable system grows with your practice as your demands for validated concentration levels and need for larger quantities of PRP evolves. Learn how you can optimize your PRP business with the Bellus Medical ProGen PRP system.

Discovery Pico Series

The Discovery Pico Series are powerful picosecond devices, featuring QuattroPulse™ technology that allows the devices to be operated in four separate emission modes: Picosecond, Q-switched, OptiPulse™ and Photo-Thermal pulse durations, giving you even more treatment options, efficacy and flexibility. The addition of the 694 nm true Ruby laser in the Plus model makes this the premier picosecond laser for skin treatments and tattoo removal. Discover the Quanta difference that is transforming aesthetics.

HydraFacial

The HydraFacial® resurfacing procedure combines the benefits of next-level hydradermabrasion, a chemical peel, painless extractions and hydration. Patented Vortex-Fusion® technology delivers antioxidants, peptides and hyaluronic acid for immediate results with no downtime or discomfort. This non-invasive, multi-step treatment incentivizes patients to come in monthly for improved skin wellness.

Advice Media

Advice Media is a leader in online digital marketing for medical practices. We offer beautiful websites and proven marketing through SEO, social media, review management and paid search so that we are the last company you will need.

Advice Media: 800-260-9497 or visit www.AdviceMedia.com

Dynamis Pro

This all-in-one, anti-aging laser platform allows fast, precise and efficient procedures with reduced recovery times. With fully customizable settings, the system achieves true third-generation Er:YAG resurfacing. The Nd:YAG wavelength is a gold standard in wrinkle reduction, acne, pigmented and vascular treatments. Nd:YAG and Er:YAG scanner compatibility further enhances treatment speed, safety and efficacy, especially for large treatment areas. The SP Dynamis combines popular aesthetic applications with additional minimally invasive surgical procedures (laser lipolysis, etc.).

Fotona: 949-276-6650 or visit www.fotona.com

Infini

Infini delivers wrinkle reduction through High Intensity Focused RF which provides three-dimensional energy to volumize tissue. Highly focused RF energy, delivered via insulated gold-coated microneedles, creates precise and controllable fractionated coagulation zones within a specific layer of the dermis. Adjustable depth control allows for customized and reproducible treatments of delicate areas. Infini effectively lowers the risk of PIH in dark skin types and can be safely used on patients with melasma and other types of pigmented lesions. Patented ComfortFlow™ technology maximizes comfort and patient satisfaction.

BTL Vanquish ME

Further improving on its patented non-invasive Vanquish technology to reduce stubborn fat around the midsection, BTL Aesthetics introduces its newly engineered BTL Vanquish ME (Maximum Energy). This latest iteration takes body contouring to the next level with increased tuning performance, more concentrated thermal energy and less scatter to non-fatty tissue than previously possible. The result is a more homogeneous heating leading to higher overall temperature elevation. A large spot size is designed to treat the whole abdomen from flank to flank during one session.

BTL Industries: 866-285-1656 or visit www.btl.aesthetics.com

InMode

InMode has revolutionary non-invasive options for fractional skin resurfacing and contraction (Fractora and Forma), ultra-fast diode hair removal (Diolaze), skin pigmentation and vascular lesions (Lumecca Photofacial) and cellulite/body contouring (BodyFX). InMode will continue to provide superior quality and innovative technology for the most in-demand procedures patients want.

Oxygenetix

Oxygenetix is a breathable foundation / camouflage designed to help heal and conceal a wide variety of skin conditions. Founded in Beverly Hills, Calif., Oxygenetix is used daily on and off the set by Hollywood's elite. This post-procedure cover-up reduces and eliminates social downtime following aesthetic procedures – the main reason many patients choose not to proceed with laser, peel, needling or dermabrasion treatments – thereby increasing your consultation to procedure conversion rate.

DefenAge Clinical Power Trio

Named "one of the biggest breakthroughs in skincare" in 2016, DefenAge's exclusive ingredient, Age-Repair Defensins®, works via a natural mechanism of action. Clinical studies prove that this revolutionary anti-aging skincare system addresses up to 16 signs of aging in just six weeks. The initial results become visible within the first week of treatment. The technology is patent-pending and can be combined with almost any skincare regimen.

DefenAge Skincare: 888-368-5372 or visit www.DefenAge.com

Halo

Halo is the world's first Hybrid Fractional Laser that delivers a non-ablative and ablative wavelength to the same microscopic treatment zone. Combining these two wavelengths creates a strong synergistic effect, resulting in ablative results with non-ablative downtime. The non-ablative wavelength of 1470 nm is tunable from 200 to 700 microns, the optimal depth for treating the epidermis and papillary dermis. The 2940 nm Er:YAG laser provides pure ablation with no bulk heating, tunable from 20 to 100 microns.

or visit www.sciton.com

ZWave

The Zimmer ZWave constitutes the latest development in the treatment of cellulite. The ZWave utilizes an electromagnetic generator to create a ballistic force that is transferred to the applicator. Utilizing soft pulse technology to enhance patient comfort, it delivers pulsed radial wave therapy to the treatment area. The ZWave is designed to temporarily reduce the appearance of cellulite. Average or typical patient treatment time is 15-20 minutes.

Zimmer MedizinSystems: 800-327-3576 or visit www.zimmerusa.com

M22 ResurFX

The ResurFX module of M22 is a true, one-pass, fractional non-ablative treatment technology. Unlike other fractional technologies, ResurFX needs only one pass to be effective, saving you time and protecting the patient's skin. ResurFX uses a 1565 nm fiber laser and a very advanced scanner, which enables you to choose from more than 600 combinations of shape, size and density for optimal treatment results. Even better, your practice wins as there are no consumables or recurring procedure fees.

Collagen P.I.N.

Collagen P.I.N. is a new innovation in advanced collagen induction therapy that introduces a controlled wound into the skin triggering the release of natural growth factors, new collagen and elastin. Automated microneedling causes less damage to the epidermis than dermal rolling, laser or other ablative treatments. Utilizing Collagen P.I.N. with our Induction Therapies clean, clinical products (specifically designed for use post microneedling) minimizes complications and provides quicker healing and longer lasting results. More needles. More power. More depth. More collagen.

ThermiRF

ThermiRF® is a platform technology that uses temperature as a clinical endpoint for various minimally and non-invasive aesthetic applications (ThermiTight®, ThermiRase®, ThermiSmooth® Face and ThermiVa®). When combined with external infrared imaging, ThermiRF applications have been shown to be safe.

Thermi, LLC: 866-981-5017 or visit www.thermi.com

Fraxis DUO

Fraxis DUO combines CO₂ laser and microneedle RF fractional technologies for optimal results in the treatment of scars and photo-aging. CO₂ fractional enables intense superficial stimulation, while microneedle RF fractional provides more global and deeper stimulation. Such complementary effects could encourage physicians to combine the two technologies to achieve excellent results in the treatment of stretch marks as well.
