

PicoWay

PicoWay – now with Resolve – is a dual wavelength (532 nm and 1064 nm) picosecond system with both non-fractional and fractional capabilities, treating a wide-range of pigmented lesions and tattoos. PicoWay's unique mode of action is based on delivering ultrashort picosecond pulses of energy to the tissue. These bursts of energy create a photoacoustic impact, which breaks up the pigmentation into smaller, more easily eliminated particles.

primelase HR

This diode laser platform has high peak power (4800 W), with three different wavelengths (755 nm, 810 nm and 1060 nm) and four spots (10 x 9, 20 x 9, 30 x 9 and 30 x 17 mm²). The latest launch is a new applicator with combined wavelengths (810 nm, 940 nm + 1060 nm) that allows permanent and safe removal of all kinds of hair on all skin phototypes. Thanks to the exclusive Ultra Short Pulse (USP) technology, primelase HR delivers ultra short pulses with a high fluence of energy, enabling the removal of even residual hair.

Double Gold

Double Gold is a new model of Hironic's Double series, delivering HIFU energy to different skin layers from 1.5 mm to 4.5 mm under the epidermis to non-invasively and effectively lift skin and remodel the collagen layer. The Double series is internationally recognized with over 1,700 systems installed worldwide. Double Gold is approved by the KFDA. Treatment time is shortened by two times compared to Double-S. Double Gold upgrades the user-friendly functions with continuous shot mode and a shot interval control system. The Double technology holds 11 patents and was named a World-Class Product by the Department of Commerce, Industry of Korea.

N-Cog PDO Thread

The N-Finders N-Cog PDO thread is reportedly the world's one and only thread under research. We are constantly exploring and studying via clinical tests based on our objectives for better care and treatment results. N-Finders provides effective and trustworthy products through continuous investment and research. We published a book based on our clinical data, which is also available in English.

Princess VOLUME PLUS Lidocaine

Princess® VOLUME PLUS lidocaine is designed to augment facial contours and restore volume to the face. Features include: combined with increased hyaluronic acid (HA) content; certified formulation of highly cross-linked HA; manufactured under the highest standards of ISO 13485 and GMP; exclusive formulation developed by CROMA laboratories; specially indicated for reconstructive treatments; optimized for minimally invasive and medical indications; correction of facial volumes and shaping contours; enhanced injectability and better mechanical stability for a long lasting effect; biofermentation guarantees optimal body tolerance.

4PLUS

4PLUS™ is the innovative solution for treatment of the most popular face and body conditions: face lifting and contouring, body tightening and reshaping, and fractional resurfacing. Its exclusive technologies are based on the Dynamic Quadripolar energy emission, which focuses action on specific tissue layers – epidermis, dermis or hypodermis – and VRF™ technology, which allows energy to be focused deep in the skin, leaving the outer layer safe from any temperature increase. The Radiofrequency Safety System and IoMT (Internet of Medical Things) exalt its high potential.

VECTRA H1

VECTRA H1 is a flexible, high quality 3D imaging solution that can be used in any location for a wide-range of purposes. Face Sculptor software provides aesthetic simulation tools for facial contouring, skin rejuvenation, rhinoplasty, chin augmentation and more. Analytic tools enable measurements of volume and contour plus visualization of texture, vascularity and pigmentation. VECTRA H1 software enables automatic stitching of multiple captures into a single, high resolution 3D image.

MOTUS AX

The new MOTUS AX 755 nm high frequency alex laser system offers totally painless and smokeless hair removal procedures to all types of patients. Utilizing DEKA's proprietary new Moveo Technology, MOTUS AX provides a high comfort procedure with excellent tolerability. MOTUS AX allows for no stress procedures for users also. The easy and full parameter controls (three levels: Soft, Medium, High) and countdown selectable energy levels give physicians the ability to tailor treatments on all patients and for all skin types.

CELLACTOR SC1 »ultra« and D-ACTOR »ultra« line

The CELLACTOR® SC1 »ultra« and D-ACTOR® »ultra« line offers an Acoustic Wave Therapy (AWT®) system for cosmetic and dermatological disorders such as cellulite, annoying fat pads, striae, scars, wrinkles and lymph congestion. The high energy acoustic waves penetrate the adipose deposits and initiate metabolic activity in the subcutaneous fatty tissue. Radial acoustic waves are applied to the skin's surface, to improve the elasticity of the connective tissue, or to smooth out wrinkles and folds. This non-invasive treatment stimulates the growth of collagen and produces a natural lifting and toning effect.

Hyabell

The new range of Hyabell® dermal fillers offers a long lasting improvement and a convincing safety profile. The pre-incorporated lidocaine (0.3%) facilitates the injection procedure and reduces pain, thus enhancing patient satisfaction. Hyabell fillers have considerably better visco-elastic properties and softer extrusion forces than other hyaluronic acid dermal fillers available, due to the innovative monophasic particle technology (MPT) production process. The optimized physical properties allow better clinical results.

Silkann Dermal Filler Cannulas and Needles

Sterimedix® Silkann® dermal filler cannulas and needles are manufactured to the highest of standards in our U.K. manufacturing facility. Incorporating a unique polycarbonate hub with a screw thread, compatible with all filler syringes, the Silkann dermal filler cannulas offer unmatched safety features. The surface finish of each cannula guarantees smooth insertion for both patient comfort and sensitivity for the practitioner. Manufactured to exacting standards and approved for sale in all major markets worldwide, Sterimedix aesthetic products offer the widest choice of cannulas to meet the demands of the modern aesthetic practitioner.

Ulthera System

The Ulthera® System delivers Ultherapy® Treatment – a non-surgical procedure using micro-focused ultrasound to stimulate the body's natural healing process to non-invasively lift and tighten skin. Ultrasound technology enables physicians to see and treat the deepest support layers of the skin without cutting the surface of the skin. The system's unique DeepSEE™ imaging ensures proper coupling of the transducer to the skin and confirms appropriate depth of treatment to avoid bone and vessels. Ultherapy has received the EU CE Mark for lifting and sculpting the dermis of the upper and lower face, neck and décolleté, and is the only U.S. FDA cleared non-invasive lift. In just one 60-90 minute treatment results appear naturally and gradually over the course of 2-3 months.

Youlaser MT and DivaTight

Due to the exclusive Mixed Technology developed by Quanta, the Youlaser MT 1540 nm and 10,600 nm fractional ablative CO₂ is uniquely combined with a non-ablative laser, making it the ideal solution for the complete range of rejuvenation offerings. The DivaTight scanner, the latest accessory developed for Youlaser MT, is an advanced tool for non-invasive vaginal rejuvenation and the treatment of mucosal atrophy and related symptoms.

Quanta System S.p.A.: +39 0331 376797 or visit www.quantasystem.com

Nordlys

Nordlys combines Selective Waveband Technology (SWT[®]) with a powerful short pulse to rival pulse dye lasers. Vascular applicators are available in two sizes to allow for easier treatment of individual lesions. The Nd:YAG has built-in SoftCool™ cooling resulting in almost painless vascular treatments. The 1550 nm non-ablative fractional laser FRAX 1550 enables skin resurfacing and treatment of acne scars, surgical scars and striae, all using a silent ergonomic console.

Aquamid

Aquamid[®] Reconstruction is a non-absorbable hydrophilic gel consisting of 97.5% water and 2.5% cross-linked polyacrylamide. It is designed for soft tissue augmentation for aesthetic and reconstructive purposes and acts by adding volume to soft tissue. Aquamid gives an immediate, natural look and feel, and integrates completely into subcutaneous tissue. It does not degrade over time, and the aesthetic results will remain for years. The efficacy and safety of Aquamid have been documented in several international clinical studies.

Contura International A/S: +45 81 100 900 or visit www.aquamid.com

Viveve System

The Viveve[®] System is a non-surgical device that remodels vaginal tissue in a single, 30-minute, in-office procedure. This treatment satisfies patient demand for a painless solution to vaginal laxity. Vaginal laxity is associated with decreased sexual sensation and urinary incontinence. The system uses patented Cryogen-Cooled, Monopolar Radiofrequency (CMRF) technology to renew and replenish the collagen scaffolding. Viveve was the first of any energy-based device company to complete a sham-controlled study of an elective vaginal procedure.

PROFHILO's

IBSA'S patented BDDE-free thermally stabilized hybrid cooperative complex is made up of 64 mg high and low molecular weight Ultrapure hyaluronic acid (HA) in a 2 mL syringe. Studies have shown optimum results in the malar / submalar areas for remodeling skin laxity using the BAP technique with just five injection points on each side of the face. PROFHILO's high spreadability and cohesiveness have also proven very effective in areas difficult to treat with fillers alone such as the forehead, hands and neck.

Halo

Halo is the world's first Hybrid Fractional Laser that delivers a non-ablative and ablative wavelength to the same microscopic treatment zone. Combining these two wavelengths creates a strong synergistic effect, resulting in ablative results with non-ablative downtime. The non-ablative wavelength of 1470 nm is tunable from 200 to 700 microns, the optimal depth for treating the epidermis and papillary dermis. The 2940 nm Er:YAG laser provides pure ablation with no bulk heating, tunable from 20 to 100 microns.

Lip & Eyelid

Lip & Eyelid is a newly developed medical device (CE, Class IIa). This phenol-based chemical peel acts at the level of the reticular dermis (deep peel). As a safe and cost-effective method, treatment guarantees excellent long-term results with amazing rejuvenation, eliminating deep wrinkles and creating the "Tridimensional lifting effect", thus receiving a high degree of practitioner / patient satisfaction according to an aftermarket clinical survey – especially for rejuvenation of the upper lip area (bar code treatment) and post-operative scars.

PowerShape2

PowerShape2 is a non-invasive system that combines bipolar radiofrequency (RF), low level laser and vacuum in one platform for safe and convenient treatments. RF delivers thermal energy deep into the dermal layer and applies electromagnetic waves to initiate physiological processes. Low level laser increases blood circulation and promotes metabolism, while vacuum massage alleviates minor muscle pain, etc. PowerShape2 provides three different handpieces for the treatment of various regions.

The Taylor Liberator

The Taylor Liberator is considered the best instrument for performing acne scar subcision. This slightly blunted, 3-tip patent-pending device provides the greatest efficiency and safety when performing extensive acne scar subcision and undermining of facial skin. It was invented and perfected by Mark B. Taylor, M.D., after more than ten revisions over a period of eight years, and performing more than 700 rolling acne scar subcision treatments. Order online for \$299 at GatewayLaserCenter.com/store.html.

SoftFil EasyGuide

The new, patented "pilot needle", SoftFil® EasyGuide offers a 2-in-1 technique: creation of a minimally traumatic pre-hole and the insertion of the cannula. Thanks to the unique shape of the needle, the cannula is perfectly positioned to be guided into the appropriate injection level. The injection is facilitated and trauma is minimized, for improved patient comfort. SoftFil EasyGuide for easy injections and much more! Innovative tools at your fingertips, for optimum results.

SP Dynamis

This all-in-one, anti-aging laser platform, allows fast, precise and efficient procedures with reduced recovery times. With fully customizable settings, the system offers true third-generation Er:YAG resurfacing. The Nd:YAG wavelength is a gold standard for hair removal, rejuvenation, acne, pigmented and vascular indications. Nd:YAG scanner compatibility further enhances treatment speed, safety and efficacy, especially for large application areas. The SP Dynamis combines popular aesthetic treatments with additional minimally-invasive surgical procedures (laser lipolysis, hyperhidrosis treatment, etc.).

ZLipo

ZLipo is an innovative Cryolipolysis™ system that makes it possible to target fat deposits and reduce them permanently and non-invasively. This method cools fat deposits over a longer period of time to a controlled and safe temperature range. ZLipo convinces with its simple and safe handling. By combining Cryolipolysis and shockwave, Zimmer offers the perfect combination treatment for significantly better fat reduction. Studies have shown that shockwave after Cryolipolysis ensures improved fat loss, stimulates lymphatic drainage and tightens skin.
